Summary: Computer Engineer specializing in Full Stack Development (.NET, React.js, Node.js) and Database Management (MSSQL, MySQL, MongoDB). Proven experience in architecting scalable web applications, ERP/CRM systems, and optimizing data workflows. Committed to delivering high-performance, production-ready solutions for complex enterprise problems.

Languages: English (Intermediate - B1)

Professional Experience:

FHT YAZILIM | Istanbul, Turkey Software Developer Intern | June 2023 – Aug 2023

- Engineered responsive web interfaces using HTML5, CSS3, JavaScript, ensuring 100% cross-browser compatibility.
- Integrated RESTful APIs for real-time data fetching, optimizing asynchronous requests to reduce page load latency.
- Collaborated on pixel-perfect UI implementation using Bootstrap, enhancing visual consistency across the platform.

TURKISH AIRLINES (THY) | Istanbul, Turkey ERP Technology & Reporting Intern | June 2022 – Aug 2022

- Analyzed complex datasets within SAP ERP systems to generate actionable insights for resource management decisions.
- Optimized reporting workflows, identifying bottlenecks and increasing report generation speed by approximately 15%.
- Executed rigorous testing scenarios to ensure data integrity during the integration of new data modules.

Technical Training & Immersion:

İSTANBUL EGITIM AKADEMI (YETENEK BASAKSEHIR) | Istanbul, Turkey Full Stack .NET Developer Bootcamp (480 Hours) | June 2024 – May 2025

- Completed a rigorous 480-hour intensive training on end-to-end enterprise development using .NET Core, C#, MSSQL.
- Architected multi-layered software solutions adhering to SOLID principles and Clean Architecture for maintainability.
- Deployed full-stack applications integrating modern front-end tools with robust back-end APIs. (Note: Integrated practical experience from Tuzla Tasarım Academy into this intensive bootcamp period.)

Technical Projects:

SaaS-Ready QR Menu & Order System | React.js, MySQL, Node.js

- Architected a high-performance Single Page Application (SPA) using React.js, creating a seamless digital ordering experience without physical menus.
- Designed a normalized MySQL database schema to handle concurrent orders, optimizing query performance for real-time updates.
- Revamped the UI for a mobile-first approach, ensuring accessibility via simple QR scanning and reducing order processing time.

Corporate Admin Dashboard | ASP.NET, ADO.NET, SQL Server

- Developed a comprehensive admin panel with dynamic CRUD operations and role-based access control for secure data management.
- Engineered efficient data retrieval using raw SQL via ADO.NET, minimizing latency in visualizing large enterprise datasets.

Jewellery Management ERP/CRM System | React.js, Node.js, Express.js, MongoDB

- Built a full-stack ERP/CRM platform for jewellery businesses covering customer management, inventory tracking, and financial transactions.
- Developed a RESTful API backend with role-based authentication, audit logging, and automated daily database backup via cron scheduling.
- Designed a fully responsive dark-themed UI with React.js and Ant Design 5, including accounts receivable/payable tracking, overdue payment alerts, and branded receipt printing.

Skills:

- Languages & Core:** C#, JavaScript (ES6+), SQL, T-SQL, HTML5, CSS3.
- Frameworks & Libraries:** .NET Core, ASP.NET, React.js, Bootstrap, jQuery, Entity Framework, Redux, Ant Design.
- Databases & Tools:** MS SQL Server (MSSQL), MySQL, MongoDB, Git, GitHub, Visual Studio, VS Code
